Complimentary and Energy Medicine practitioner

Patricia Sihlanick

Regenerative Health Technology Specialist

Can hemorrhoids be cured without surgery?

Ans.: The answer is yes. Hemorrhoids are actually varicose veins of the rectum. Focusing in on the root cause, one has to address detoxing the liver first. The more congested the liver, the greater the hemorrhoids. A good first step is to detox the liver using: Essiac tea, milk thistle, Premier Research's Complete B and Liver ND, Tox-Chord and Hepta-Chord by Energetix, and Iso Pathic Phenolic rings by Energetix. Organic, cold pressed omega 6 oils are also important. *Have to test energetically to select the best remedies.*

Once the liver congestion is resolved, there are ancient remedies that actually work to resolve the hemorrhoids. • **Mullen Flower** available from [etsy.com](https://www.etsy.com). This remedy is a demulcent, which creates a soothing anti-inflammatory coating over mucous membranes. Brew the flower and drink it like a tea twice a day.

- **Yellow dock (Rumex crispus)**: is a common weed found in Serbia, Korea, and China. It works as a laxative and has anti-inflammatory effects. It also contains chemicals that might kill parasites, bacteria, and fungi.
- Raw cabbage juice mixed with celery, carrots and Granny Smith apples: make 6 ounces and drink twice a day until hemorrhoids resolve.
- **Collinsonia root**: Stone root (*Collinsonia canadensis*) is an herb with a strong, unpleasant smell. It has been used for kidney stones, gastrointestinal conditions, and hemorrhoids.
- Pure Synergy, Whole Body Collagen, and Cyruta Plus

Can congestive heart failure be resolved without drugs?

Ans.: Absolutely. I had a patient who was in hospice waiting to die with congestive heart failure. The key is to define the root cause(s). This particular patient had numerous dental issues (mercury fillings, toxic root canal teeth, galvanic currents from mixed metals in his mouth, teeth and gum infections).

Again the key is to define the “splinters” and remove them. The patient was placed on 80 vitamins a day. In seven months his congestive heart failure improved by 85% as documented by hospital records.

Can chronic post-concussion headaches be cured without drugs? Can Autism Spectrum and Epilepsy be reversed?

Ans.: One of my patients had 21 years and 9 months of post-concussion headaches. In on visit using a cranial manipulation technique, his headaches completely disappeared. Treatment took place in 2017.

Can chronic atypical facial pain be cured?

Ans.: A patient was referred to me because she suffered 2.5 years with atypical facial pain that did not respond to conventional treatment. A diagnosis of Strep veridans was made in the jawbone where the tooth was extracted 2.5 years ago. An injection of procaine, DMSO, and Sanum homeopathic remedy plus Rife frequencies cured the patient.

Can walking pneumonia be cured without drugs? Ans.: Yes.

A 14 year-old female patient was diagnosed with walking pneumonia. In two days, she was cured with Rife frequencies.

Can Autism Spectrum and Epilepsy be reversed?

Ans.: Yes. A 15 year-old female was diagnosed with Autistic Spectrum and Epilepsy. Her abnormal behavior resulted in expulsion from school. Top tier university hospitals, neurologist and other medical specialists in Toronto area could not resolve the problem. A diagnosis of aluminum and MMR vaccine was made in the brain and thyroid gland. Nine months of nutritional treatment to remove the two “splinters” the girl’s Autistic Spectrum and Epilepsy disappeared.

Can lung cancer be cured without surgery and chemo therapy?

Ans.: Yes. In 2017, a patient was referred to me who had lung cancer. The oncological surgeon removed the tip of the right lung where the cancer was present. In six months the cancer came back in the left lung. The patient opted for an alternative approach. A diagnosis was made of CMV from a root canal tooth, mercury, and a pesticide present in the cancerous tissue. The root canal tooth was extracted and nutritional therapy implemented to remove the other two “splinters.” in six months the cancer was gone as documented by hospital records. Treatment took place in 2017. The patient is still cancer free.

Can psoriasis be cured?

Ans.: Yes. I personally had a patch on my wrist for several years. Two months of treatment with full spectrum light, Bioptron, totally resolved the psoriasis.

Can gall stones be cured? Can brain tumors be resolved with alternative treatments?

Ans.: Absolutely. A patient who was diagnosed with 75 gallbladder stones was scheduled for surgery. The patient told her surgeon she was opting out and going the alternative route. The surgeon told the patient it doesn't work. In 8 weeks using Choline, AF Betafood, and apple juice and a gallbladder flush all the gall stones were gone. The surgeon would not accept her telephone calls.

Can brain tumors be resolved with alternative treatments?

Ans.: Yes. A medical surgeon was referred to me who was diagnosed with Glioblastoma, a very aggressive brain cancer. A diagnosis of mercury and glyphosate was made as the "splinters" that initiated the brain tumor. The patient was placed on ozone treatments plus two homeopathic remedies, Ruta graveolens 6 and calcium phosphate plus antioxidants, glutathione, curcumin, and Humic and Fulvic acid. Following three successive CAT scans the tumor is shrinking and the patient has no more seizures.

Can a liver transplant be averted with natural remedies?

Ans.: Yes. Fred was brought to me by his wife who found my website. Fred refused the surgical approach and thought of having to take anti-rejection steroids for the rest of his life. A diagnosis of hepatitis A and benzene was made. These two

“splinters” were in his liver causing it to be swollen for 27 years. Seven months on nutritional supplements to remove the two “splinters” his liver that was swollen for 27 years went back to normal. Treatment took place 2010.

Can back pain be resolved without drugs or surgery?

Ans.: Yes. A patient whose husband suffered lower back pain for 8 years was evaluated. The pain started soon after a crown was placed on the patient’s lower right second molar. One small adjustment to the contact on the biting surface of the crown immediately resolved his 8 years of pain. Treatment took place in 2000.
